

G38 Second Hand

Drillmec second hand G38, fully hydraulically driven, 3-axle truck mounted drill rig able to drill water well depth up to 600 m with 8 5/8" – 10 3/4" hole.

The G 38 permits maximum flexibility and cost effective usage of all mounted equipment and is able to provide a full actual 38,970 kg pullback capacity (intermittent).

In addition the features low effort control system for all set-up, drilling and pipe handling functions, making possible safe and economical operation with minimal crew size. The hydraulic system is sized to provide a wide range of rotation torque and speed performance as well as high hoist rates for reduced drill string tripping time.

Arranged for air and mud drilling with deck-mounted air compressor and mud pump.

For more informations please contact Mr. Riccardo Bramucci (r.bramucci@drillmec.com)

G - 38

- Power is supplied from **main engine Deutz BF8M 1015CP 536HP** power @ 1900 rpm through the transfer case.
- **Clearance** between the spindle and the working table: **8,5 m**.
- Static **pull back capacity: 38,970kg** (85914 lbs)
- **Power swivel** designed to provide the drilling speed and torque characteristics required for tri-cone rotary bits and down-the-hole hammers.
