

DRILLMEC
DRILLING TECHNOLOGIES

COMPANY PROFILE

OUR COMPANY

Simplifying complexity through innovation

Drillmec is a worldwide leader in design, manufacturing and integration of full drilling rig and workover packages for onshore and offshore applications. The results achieved in over 100 years of international experience have been recognized by customers worldwide and stem from our commitment to continuous improvement through the pursuit of high quality, strong focus on people and emphatic efficiency

throughout the whole process.

At the core of our company's identity are three principles: safety, respect for environment and innovation.

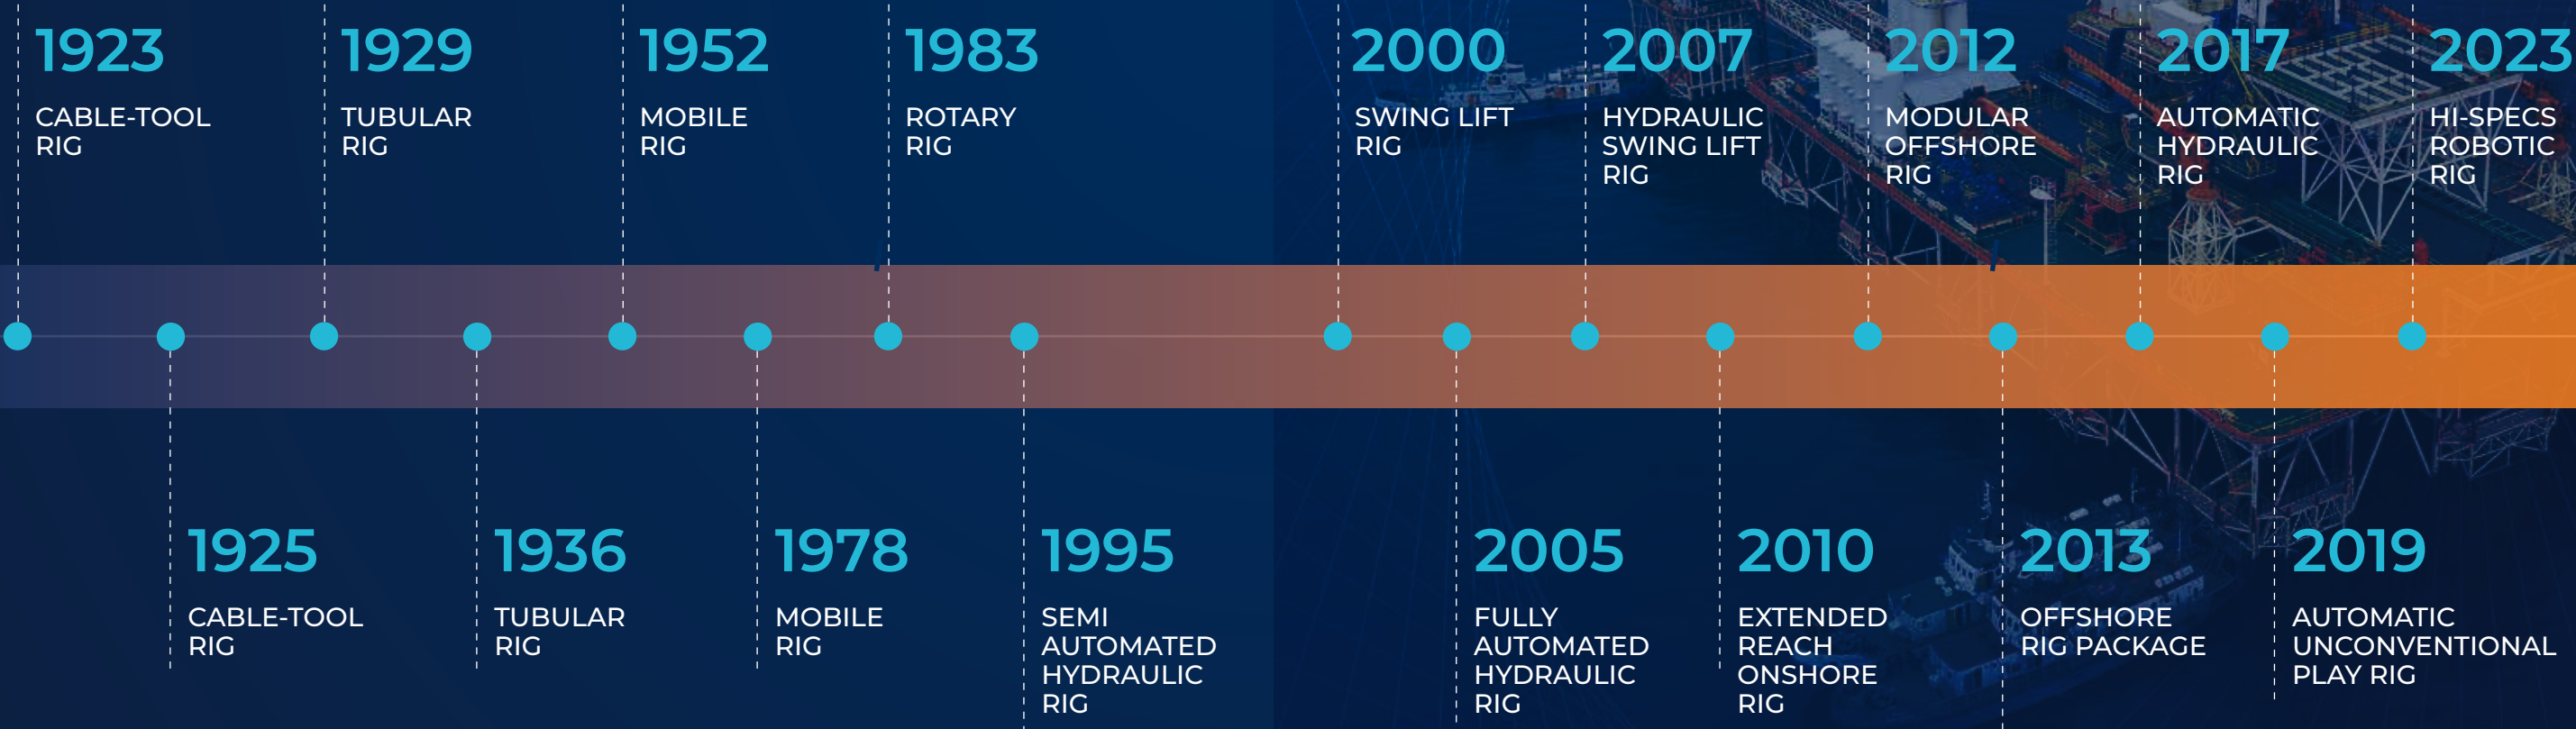

Our worldwide reputation of reliability is a reflection of our extensive engineering development, timely deliveries and excellent customer care service.

1990s - 2020s > INNOVATORS

PRESENCE

Local service, global reach

Our extensive network covers from field services to drilling crew training. Our equipment works every day in a variety of formations, climatic conditions, languages, cultures and skills. With a robust design, our product lines are able to work everywhere. The use of our rigs and drilling equipment on jobsites all around the world exhibits the effectiveness of our comprehensive technical solutions developed with the

needs of our customers in mind, to be able to keep high performance levels under different and difficult working conditions. Our international reach rests on a solid structure of a widespread and an efficient network stretching around the world through field service offices, distributors, agents and subsidiary companies.

All our rigs and equipment are designed to cover all required loads, climates, and environmental specifications

ITALY | PIACENZA

Drillmec S.p.A. based in the manufacturing heart of Italy, are the Headquarters that manage the Drillmec group through world class engineering, production, R&D, testing and after sales services.

215,000 m²

USA | HOUSTON

Drillmec Inc. manufactures, engineers, integrates and upgrades drilling rig packages in the oil&gas capital of the world through a fully stocked production and refurbishment facility with an extensive rig up area.

52,500 m²

INDIA | HYDERABAD

Drillmec's facilities situated in the South-Est of India manufacture and assemble rig packages mostly serving the Middle East and Far East market.

350,000 m²

OUR VISION

Innovation. Deep down.

Our vision is to become the preferred supplier in the onshore and offshore drilling industry providing our people and our customers with a safe and healthy work environment and with a continuous focus on creating value for our customers and maximizing the return to our shareholders.

We strive to engineer world class products through innovation and technology to help our customers achieve top performance in the safest way. We are constantly focused on foreseeing challenges before they arise and engineering technical solutions.

OUR IDENTITY

Constantly striving to think ahead and reach new horizons, creating the unthinkable

Our identity lies in our common goals, our attention to details, and our commitment to the communities in which we operate. However, it is our passion for customer specific solutions, innovation and service that sets us apart from our competitors. Integrity is the very foundation of our business principles and is one of our most important qualities. It is the way

we work every day and how we treat our clients, suppliers and partners, while also delivering our dependable products. With this in mind, we are continuously developing a distinctiveness that our customers trust. We are proud of our customers' loyalty, built year after year, one safe and reliable product after another.

DIGITALIZATION

Reinventing a more conscious oil and gas industry, every day. For now.

We move fast to meet the increasingly demanding upstream industry. While development and application of automation technologies is a reflection of our historical pursuit of safety and performance, DEEP (Drillmec's Embedded Efficiency Platform) has brought our products to the next step.

In the spirit of Italian tradition, our aim is to create innovative and consistent solutions.

MACHINE LEARNING

DEEP incorporates machine learning and artificial intelligence to fulfill new requirements for system integration of the whole drilling package, data touch points and processes, leading to advanced data analyses that facilitate improvements in drilling performance, equipment reliability and maintenance, and safety.

AUTOMATES

DEEP automates repetitive operations and integrates a data system that gathers rig and drilling information to optimize performance, safety and maintenance through just-in-time analyses and action plan suggestions.

PANORAMIC VIEW

A global OEM company that engineers cutting edge solutions to the oil and gas industry

PEOPLE

Attention to employees and their families, training and valuing the younger generations, improving their skills with the support of the more experienced are just some of the fundamental aspects we have always committed. Whilst our rigs are state of the art, it is our people who created, designed, built, and tested them.

INNOVATION

Years of experience have enabled us to overcome the challenges of our clients by finding solutions that are both reliable and cost-effective. Our skillful in-house engineering department supports new projects as well as rig upgrades and refurbishment work. In order to guarantee accurate results, we supply thorough and detailed documentation of design and related working procedures

QUALITY

Our Quality Assurance and Quality Control are key to our success in the world of high technology manufacturing. Drillmec's quality management procedures abide by API (American Petroleum Institute), DNV - GL (DNV Business Assurance), RTN (Rostekhnadzor) and EAC (Russian approval) and can also work under Norsok, ABS and RMRS, if required by the client.

SAFETY

Health Safety & Environment (HSE) department is part of the driving force behind our planning. Our comprehensive HSE plan combines carefully crafted procedures to ensure personnel safety at all times.

ENVIRONMENT

This is right at the heart of our company in our products. We seek to reduce environmental impact through a proactive and safe approach in each operation and process.

OUR BRAND

A complete portfolio for your drilling needs

Today we stand as a reference for onshore and offshore drilling rig packages and we help our customers to continuously raise performance through our proven technical expertise, global aftermarket network and trusted quality.

Our engineers apply years of experience to deliver optimal solutions based on material selection, service application and functioning criteria.

Our presence in the oilfield industry means design, manufacturing, commissioning and service for

conventional and hydraulic land rigs, mobile and workover drilling rigs.

We provide full drilling rig packages for brand new projects but are also experts in integrating rig upgrades and refurbishments.

We utilize the latest available software to analyze data, guaranteeing accurate results and providing clients with the necessary calculations and certifications according to API and DNV requirements.

ONSHORE

Our land rigs portfolio covers every single requirement of the onshore industry: from fast moving pulling units to stationary land rigs; from hydraulic super single units to extended reach arctic rigs.

The main land rig series also includes high-specification rigs based on electric and hydraulic hoist technologies fitted with latest robotic pipe handling and digitalization in order to boost drilling efficiency for both conventional and unconventional applications.

EQUIPMENT

Our drilling equipment and components are designed to mechanize and automate drilling rig processes.

Our extremely broad portfolio includes several capital drilling equipment and accessories, including top drives, mud pumps, drawworks, pipe handling systems, ironroughneck, able to integrate full drilling rig packages.

OFFSHORE

We work with the majority of the international oil companies and drilling contractors taking part in their drilling, workover and P&A programs throughout the world covering a very wide range of installations from shallow water light drilling to deep water extended reach wells.

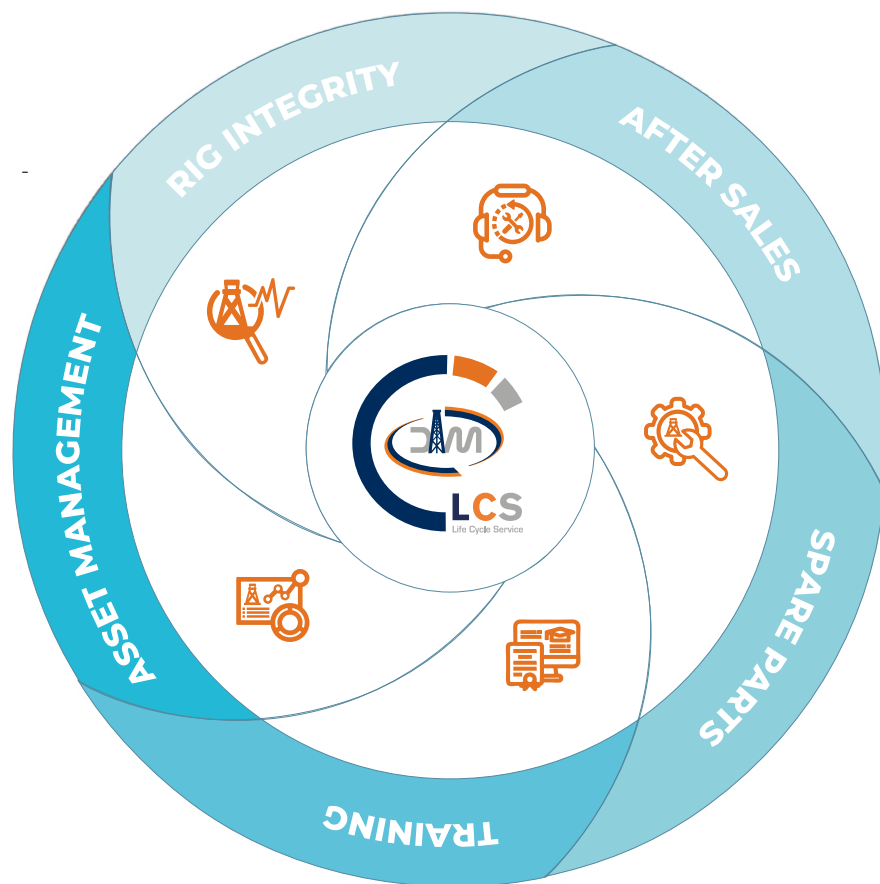

SERVICES

Providing a full range of services throughout the life cycle of the rig package or the equipment

Purchasing a Drillemec product entails choosing a brand that will be by your side throughout the life cycle of the rig package or drilling equipment provided. Our experienced and skillful team of field technicians worldwide, together with our 24/7 diagnostic center and our spare parts warehouses strategically

located around the globe guarantee an all around superior quality assistance. On top of this, our world-class IWCF/IADC certified training center is available for in person or remote training for your drilling crew through cuttingedge simulators, with safety and performance in mind.
